

TORO/Irritrol Series Controller

6, 9, or 12 Stations

Features

- Applies the right amount of water—every time—to ensure healthy landscapes while providing significant water savings and reducing urban runoff
- The patented WeatherTRAK®-enabled scheduling engine eliminates the guesswork out of programming by tailoring the watering times based on downloaded site-specific information
- Daily weather updates via the ET EverywhereT data service eliminate the need for adjusting the controller to meet changing weather conditions
- Four programming modes:
 - Automatic with daily ET EverywhereT downloads
 - User-defined programming with daily ET EverywhereT downloads
 - User-defined programming without ET EverywhereT downloads
 - Off
- Built-in one-way pager to receive ET EverywhereT weather data
- Cycle and soak programming allows up to 16 cycles per start time
- 365-day calendar to program month, date, and time of day including time zones, plus automatic updating for daylight savings as optional function
- Compatible with normally closed rain sensor
- Sensor bypass switch
