

NSN Connect gives you the ability to access your SitePro® computer anytime from anywhere - simply and securely! You can access your SitePro system - your programs, files, e-mail - whether you are at home or on the road. All you need is a web capable computer or hand-held device and internet access. No need to learn another piece of software. And there is no charge for the full feature set for current NSN subscribers!

Benefits:

- No fees (it is part of NSN subscription)
- Run your entire system through your Mobile phone or Prism Handheld
- Monitor System flow and pressure
- Monitor Alarms and resets of system and pump station
- View SitePro software and/or make changes
- Rain shutdown, cancel hold and/or turn back on your system
- Replacement option for hand held radios!
- Easy file transfer and data back-up
- Remote document printing
- Remote access activity logs
- Multiple levels of security

iPhone

Cost:

- One license to control one system is at no charge for current NSN customers.
- Customers must have a current NSN Subscription to be eligible for NSN Connect.
- Additional licenses cost \$120.00 for a 12 month license.
- To obtain an additional license, e-mail NSN_Connect@toro.com . Prices for additional licenses are subject to change without notice.

Network Hand-held Radio Interface

Network Hand-held Radio works in conjunction with SitePro® and puts manual irrigation capabilities in your hand. Whether you're doing spot watering, broad area irrigation or troubleshooting, Network Hand-held Radio allows you to conduct watering activities while you're on the move. Take your radio with you to manually start/stop programs, run individual stations or groups of stations, initiate syringe watering and more.

- Simple command set
- Extensive start and syringe capabilities
- Comprehensive multi-manual functionality
- System and program pause and resume
- System On and Off command activation
- UL listed
- Built-in programmable radio

Network Radio-Link and FIU with Radio

Network Radio-Link offers you the flexibility to design your irrigation system unconfined by the limitations of distance or terrain. Oversized acreage and natural barriers are not a problem for Network Radio-Link. Communicating where wires can't run, it's the bridge between non-contiguous wire line systems and much more.

Product	Description	Pkg	Each
